PRODUCT LEADERSHIP

Principal-level product leader with 15+ years of product management and engineering experience. Builds and scales enterprise platforms, AI-enabled experiences, APIs, and regulated workflows from strategy through global launch. Known for translating complex customer, operational, security, and partner needs into multiyear roadmaps, executable operating models, and measurable outcomes.

SELECTED IMPACT

- Led strategy and investment prioritization for a **\$200M+ annual entitlements portfolio** and a service-management offering estimated at **\$46M** for FY26-FY27.
- Scaled an AI-ready customer-context platform to **4+ live contact-center portals** and **9+ downstream services**, reducing support-case misrouting by **6%**.
- Expanded verified customer eligibility and license signals to **100%** of targeted rules, preventing approximately **\$6K per day** in routing overpayments.
- Defined a cloud-partner support offering with **67%** initial billing activation, an estimated **\$250K annualized run rate**, and a projected **\$1.2B five-year opportunity**.

CORE EXPERTISE

Product strategy and vision | Enterprise platforms and APIs | AI product strategy and evaluation | Customer support experiences | Identity, entitlements, and access | Portfolio prioritization | Monetization and business cases | Responsible AI and human-in-the-loop workflows | Security, privacy, and compliance | Executive stakeholder leadership | Global launches and operating models

PROFESSIONAL EXPERIENCE

MICROSOFT | Senior Product Manager

USA | Feb 2024-Present

- Own strategy, investment priorities, roadmaps, launch governance, and cross-portfolio execution for enterprise customer-support platforms spanning customer identity, eligibility, entitlements, routing, partner offerings, and regulated access.
- Scaled **Know Me**, a reusable API and AI-agent platform that unifies customer identity, profile, entitlement, and support context. Enabled consistent identification, support-access decisions, and case routing across 4+ live portals and 9+ downstream services; reduced support-case misrouting by 6%.
- Led the cloud-partner support offering from business case through partner onboarding, billing, support workflows, and launch. Achieved 67% billing activation and an estimated \$250K annualized run rate; defined delivery strategy for a projected \$1.2B five-year opportunity.
- Delivered real-time eligibility and license signals across digital and phone support channels. Achieved 100% targeted-rule coverage and prevented approximately \$6K per day in routing overpayments.
- Directed the entitlements platform that determines support plans, purchased benefits, and service eligibility. Shaped investment across a \$200M+ annual portfolio and a service-management offering estimated at \$46M for FY26-FY27.
- Replaced a six-month-plus manual government-support setup process with an auditable AI-enabled workflow completed in two weeks. Coordinated 10+ teams to ensure compliant, traceable case assignment.
- Established executive decision forums, roadmap and launch governance, dependency management, and risk plans across multiple product portfolios; stopped low-value investment when evidence did not support ROI.

PROFESSIONAL EXPERIENCE (CONTINUED)

COMPLIANCE.AI | Director of Product

USA | Feb 2023-Jan 2024

- Directed AI/ML strategy for a regulatory-intelligence platform, translating complex regulatory content into actionable governance, risk, and compliance workflows.
- Defined AI-enabled experiences, API integrations, customer-feedback loops, and production-readiness criteria centered on accuracy, explainability, and enterprise trust.
- Led product managers and API engineers across packaging, integrations, and customer delivery; contributed to a reported 30% increase in customer retention.

MICROSOFT | Senior Product Manager, News & Feeds

Canada | May 2022-Feb 2023

- Set vision, strategy, OKRs, and launch plans for AI/ML-powered misinformation experiences across Microsoft News and Feeds.
- Delivered improvements associated with a 10% increase in daily active users while strengthening release quality and cross-functional execution.

MICROSOFT | Senior Product Manager, Azure Communication Services

Canada | 2020-2022

- Led vision, roadmap, monetization, and launch execution for Job Router, a core contact-center capability.
- Converted 50+ customer surveys, 20 focus groups, and 140+ requirements into roadmap priorities; contributed to a 20% increase in service daily active users within three months.
- Established release governance and quality checkpoints across engineering, design, field, and customer stakeholders.

LIGHTBEND | Technical Product Management Lead

2020

- Launched a cloud-native SaaS solution for open-source developers and enterprise customers; shaped business strategy, capacity planning, and pricing.

BOEING | Senior Technical Product Manager

2018-2020

- Led a cloud-based flight-data analytics portfolio using data and AI/ML capabilities; onboarded 100+ aviation customers and enabled a reported 20% reduction in flight-operations costs.

CA TECHNOLOGIES | Technical Product Manager

2015-2018

- Launched an API-management solution and developed pricing and packaging strategies that contributed to a reported 40% increase in customer retention.

PAYBYPHONE | Product Manager

2014-2015

- Led mobile-parking product strategy and launches for major cities including San Francisco, Paris, and Vancouver.

BORDEN LADNER GERVAIS LLP | Technical Product Manager / Software Developer

2003-2013

- Progressed from software development into product leadership for enterprise document-management products, including a national OpenText eDocs deployment.

EDUCATION & CERTIFICATIONS

Master Certificate in Product Management, George Washington University

Bachelor of Technology, Computer Systems, British Columbia Institute of Technology

Bachelor of Engineering, Industrial Engineering, Amir Kabir University

Pragmatic Certified Product Manager | SAFe Agilist | Certified Scrum Product Owner | Microsoft Global Hackathon credential and award recipient, 2024, 2025, 2026

INDEPENDENT AI APPLICATION

CaseRouteIQ - Customer-Aware Support Agent

Live application: <https://know-your-customer-agent.onrender.com/>

- Designed and launched an interactive AI support-agent application that identifies customer context, checks service eligibility and SLA, recommends trusted self-help, recognizes related issues, and guides appropriate case escalation.
- Built as a realistic product demonstration using fictional customer data to show a context-first support journey from identification and qualification through guidance and resolution.
